

Indiana State Sentinel.

Published every Thursday.

INDIANAPOLIS, SEPTEMBER 13, 1849.

[Volume IX: Number 14.]

NEWS OF THE DAY.

To Correspondents.

If "J. G. R." will make his "Original Poetry" readable, we may publish it. To have it re-written, and then to examine, is more than we can possibly find time for. Why does he not patronize the writing matter now here? It would certainly relieve him by quieting his nerves, which seem to be distressing to him while writing his present hand.

SENATOR WHITCOMB.—The Madison Courier states that Ex-Governor Whitcomb is still at James Town, N. Y. We learn from a letter to a friend that his health was improved, and that he will return to Indiana in a short time.

The Anderson (Ind.) Democrat boasts the name of Gen. Joseph Lane for President in 1852, and Hon. John A. Dix of N. Y. for Vice President. A race between Lane and Taylor is what we should like to see right well. The result could not be doubtful.

ALABAMA.—The Tuscaloosa Observer gives a list of the members of the next legislature. It allows the whigs a majority of one in the Senate, and the democrats a majority of twelve in the House, and on joint ballot, eleven; which will enable the legislature to elect two democratic Senators to Congress.

We ask the Editor of the State Journal, in all candor, whether, as an honest and free Indian, he does not believe, with us, that Taylor richly deserves a coat of tar and feathers for his infamous conduct towards the gallant General Lane and our volunteers? Answer candidly, for once.

The Councils of Cincinnati and St. Louis have both resolved to withhold their subscriptions, the first of \$1,000,000 and the last of \$500,000, from the prosecution of the railroad through those points. A new survey is now thought of, the present location of the route not being satisfactory.

SOME TOMATO.—A lady at Waverly has sent us a Tomato, which we call. It is none of your double concerns, but a whole one, measuring some 19 inches in circumference, and weighing a little less than two pounds! If any body can beat this, we think she will try again, as we know she is not to be beaten. Mrs. C. has our thanks.

GRAPES.—Grapes are now in season, and the crop is generally abundant. Several friends have sent us specimens, but if any person can exhibit a bunch of grapes equal in weight and size to one now on our table from a year old vine on the premises of G. A. CHAPMAN, senior editor of this paper, we should like to see it. It is of the Catawba variety.

PEACHES.—We have received several varieties of peaches presented to us this season, some of which we have noticed. The last was one raised by Hon. O. H. SMITH, called the *Delaware* Cling; but it measured only nine inches in circumference, and was not quite as heavy as a large pumpkin. But on the whole, thus far, we must give the preference to those of J. S. SPAN, being a Freepit, which we did not measure, our *late* being loomed. At all events, one would be puzzled to carry one in his hat.

A MAN OF LETTERS.—Mr. Collamer, the Postmaster General has received from the University of Vermont the honorary degree of L. L. D. Of course the Postmaster General must be a man learned in letters, but whether the L. L. D. stands for "learned in dead letters" or not we cannot say. If it had been the degree of L. D., *dean* on *Locos*, we should have seen right through it.

MAIL IRREGULARITIES.—The Cincinnati Gazette, the leading whig paper in the west, is alluding to several instances of mail failures and irregularities, says "We recommend to our friends to have patience, as things will come right after a while." That is right; but it should have told its "friends" that "after a while" means after the next Presidential election. With the up-heads and scoundrels in management now, nothing better can be expected before "after a while."

HISTORICAL FIRE.—An address at the Anniversary of Calhoun Society and Lyceum, of Wabash College, July 18, 1849. By CHARLES BECHER, of Fort Wayne.

Such is the title of a neat pamphlet laid on our table. We have not had time to read it, but Mr. Beecher's reputation as a writer and speaker, is sufficient evidence of its merit to warrant us in recommending the address. It is for sale at the book-store in this city.

FIRE.—On Wednesday night last, at about 12 o'clock, the store of Wm. E. Sargeant, in Griffith's block, Washington street, was discovered to be on fire, by a person who happened to be in the street. The alarm being promptly given, the fire was easily put out, without material damage to the building, though the goods in the store were all more or less damaged, and much entirely destroyed. The goods were insured in the Columbus Ohio, company, J. W. Hamilton, agent, for \$3,000. This sum will no doubt cover the loss sustained. The fire was evidently the work of an incendiary.

DEATH OF THE HON. AMOS LANE.—We learn from the Lawrenceburg papers that Mr. Lane is no more. He expired at his residence in Lawrenceburg, surrounded by his family, on the 5th inst, at about 9 o'clock in the evening. Colonel Lane has filled a conspicuous page in the history of Indiana. He was a Representative in Congress from this State from 1833 to 1837; was regent of a member of the House of Representatives of this State, and served one session as Speaker. He was a lawyer of the first ability, and his commanding talent always secured him a distinguished place among the able men of his day. Peace to his ashes!

MACAULAY'S HISTORY OF ENGLAND.—This history, by the celebrated Thomas Babington Macaulay is so well known, has been so often spoken of and extracted from by the press generally, that anything we might say of it at this time, would probably be deemed superfluous. We have the pleasure to inform our readers, however, that a full and complete edition, two volumes in one, has just been issued in Cincinnati, and at a very low price, considering its immense cost in the east, of Harper's re-print. That sold freely at from \$5 to \$7. This present edition can be had at the low price of \$1.50.

CHOLERA REPORT AT LAFAYETTE, INDIANA.—The Daily Journal of the 1st instant publishes a complete and final report of the ravages of the cholera in Lafayette. The period embraced is eight weeks, from July 24 to August 27th. The population of the town during the prevalence of the disease, it should be borne in mind, was about 3,500.

| First week, | 14 | 8 | 4 | 0 |
|---------------|-----|-----|----|----|
| Second week, | 31 | 23 | 14 | 18 |
| Third week, | 36 | 29 | 20 | 10 |
| Fourth week, | 48 | 32 | 24 | 12 |
| Fifth week, | 47 | 35 | 22 | 14 |
| Sixth week, | 26 | 13 | 9 | 6 |
| Seventh week, | 16 | 7 | 5 | 3 |
| Eighth week, | 10 | 8 | 3 | 3 |
| Total, | 228 | 155 | 95 | 64 |

SINGULAR AFFAIR.—A Mr. D. Burroughs, of Buffalo, while playing at ten-pin at Avon Springs, broke his thigh. It was done by the muscular action of throwing the ball.

Another New Invention.

Among the many new inventions of the present day, and one which seems to us to fully meet the objects for which it is designed, we have seen none which appears to us more perfect than

Elisha Hale's Rotary Pump.

To this machine we earnestly invite the attention of the public; because we have the opinion of an able and scientific man to back our own judgment of its value and importance. This invention, unlike many others made only to fleece the public, without any good quality to recommend them, and finding purchasers merely on account of their novelty, is one which will speak for itself, it being so simple, notwithstanding the variety of uses it is capable of being applied to, that any person can understand its operation.

Messrs. COOK & HUNN have one in operation at the Palmer House, and also a model of the same, by which it can be thoroughly examined. For the benefit of those who will not probably see it, we will give a short outline of its capabilities. This machine is on the Rotary principle, and to our mind effectually solves the problem of this applying power. It was patented a little less than three years since.

The patentee sets forth five different uses to which it is applicable, viz: as a Pump, Fire Engine, Water Wheel, Ventilator for Mines or Factories, and a Steam Engine. And we can conceive of other uses, with very trifling additions. They are thus noted.

As a Pump, suitable for dwellings, it will raise thirty gallons of water a minute, with the power of a child only applied. With twice that power, eighty gallons a minute. With a one horse power, 500 to 1000 gallons a minute! One with a wheel of five feet, 100,000 gallons a minute.

A Fire Engine constructed on this plan, with half the number of men usually required, would be far more effective than any now in use; capable of throwing a much greater quantity of water a longer distance, with one-fourth part of the exertion.

As a Water Wheel, it must, when generally understood, be adopted, especially where water is scarce, as it is worked both by the entering and departing water.

As a Ventilator, it is peculiarly adapted, either for ships or mines, and can easily be fitted as a blower for furnaces, &c.

As a Rotary Steam Engine. The introduction of sliding valves renders its use perfectly satisfactory in this respect, and all tests have so proved.

Another consideration is the very small space occupied by the machine. They are of course made of different sizes, according to the use for which they may be intended; and they can be easily constructed and are not likely easily to get out of repair. We have not room to give a detailed description of its construction, and would again urge every one to give it an examination. Messrs. Cook & Hunn will take pleasure in exhibiting it and explaining its particulars. They have sold the rights for ten of the small northern counties, as we are informed, and are desirous of selling the balance of the State, either as a whole or by districts. Having a desire to return east, they will remain for a few days for the purpose of receiving applications.

From what we have heard here, there is no doubt but it would be a profitable and satisfactory investment; for we have been told that numbers of the pumps could be sold at once, had the agents made preparations to sell them. Remember, at the Palmer House it is to be seen.

STATE AUDITOR.—By reference to another column, it will be seen that Dr. E. W. H. ELLIS is announced as a candidate for the office of Auditor of State.

That there will be a change in that department, we believe is generally understood. And while we freely award to the present incumbent high merit, at least so far as we have had connection with the office, and one against whom but few if any complaints have been made during his term, we know that he is too old and able a politician, and too familiar with party tactics, not to expect to be displaced, or to find fault in case he should be. We therefore hope he will see the error of his political ways, and join the true Democratic party.

In all probability there will be some one candidate for the several offices on which the Legislature has to act. And we do hope that among them all, there may prevail the true Democratic spirit—that each will yield to the will of the majority.

In the case of Dr. Ellis, we may say that we feel satisfied that he will be the last one to do so to mar the harmony of the party, or to occasion discord. Like all others, he has the same right to present his name, and ask for office. And that he is qualified, none will doubt. We have known him long, and as an efficient co-worker in our glorious cause. For ten years he has labored at the editorial bar; and those only, perhaps, who have toiled at it, can appreciate such services. He has served the people of his county some eight years as their Auditor, and they have delighted to honor him for the faithful discharge of his duties. He has taken an open, candid, dignified and able part in assisting to regenerate our State from the Federal Whig political thralldom, which had sunk it into almost eternal political disgrace. And while we would do all in our power to prevent sectional jealousies, it may not be amiss to say to those of favored sections, that Dr. E. is from the north—a section which has battled nobly and gloriously for the cause—not looking to men.

Situated as we are, we do not wish to appear as attempting to forestall the claims or chances of other deserving candidates. We have only spoken in this instance, because the spirit moves us to give credit to one to whom credit is due. The Democratic party has much good timber out of which to erect her political fabric; and her workmen know how to select it.

"The will of the people as expressed through their REPRESENTATIVES IN CONGRESS ought to be respected and carried out by the Executive."—[Taylor's Alliance Letter.]

According to present indications, Gen. Taylor will have an opportunity to reduce his theory to practice; and that too in a manner not very much to his liking. The "will of the people" bids fair to be expressed through their representatives in the next Congress, in favor of the continuance of the Democratic measures, and policy of the late administration, and against the revival of the federal humbug of a protective tariff, a corrupt system of internal improvements, a mammoth bank, etc. That "will," if not respected by the Executive, will carry with it the power to respect itself and to insure obedience to its decrees.

We learn that Rev. W. H. GOODE has been appointed Presiding Elder of the Indianapolis District, for the North Indiana Conference. Rev. Mr. HULL has been appointed to the Robert's Conference, in this city. The conference was held at Logansport during the present week. We hope to get a list of the remainder of the appointments for our next paper.—[Journal.]

Railroad Convention at St. Louis.

A large committee of gentlemen of the very first respectability in St. Louis, have addressed a Circular, in behalf of the people of St. Louis, to the people of the United States, inviting them to send delegates from every State and Territory in the Nation, to a convention to be held in St. Louis, the third Monday in October, 1849. The object is to devise ways and means for the construction of a Railroad through the territory of the United States, connecting the Atlantic and Pacific States. The hope is expressed that every district will be represented, "so that the hospitality of St. Louis shall rejoice in the fullest exercise and enjoyment of its means; and that a quickening voice may go forth from the assembled mass, that shall give to the great measure of American Progress assurance of its triumph."

We agree with our neighbor, the Journal, that this State, and Indianapolis, particularly, should be represented in this convention. Let our intelligent business men think of the subject and agree upon some time for a meeting to appoint delegates.

In relation to the importance of the proposed communication, the Circular says:

"We feel assured that investigation and discussion will demonstrate to the world that the Pacific Railroad and telegraph are practicable and attainable objects. That they will prove them to be above merely party considerations, and exclusively of national importance; that their influence will be co-extensive with the Republic; that they will tend to increase its power, wealth and grandeur, to elevate its higher its character among the nations of the earth, to confirm and render indissoluble the attachments to us of our most distant provinces, and to strengthen and perpetuate the bonds of our national Union."

"We derive our justification for these anticipations from a multitude of reasons, military, political, social, and commercial, which cannot fail to suggest themselves in every serious consideration of the subject. The effect upon the public lands in promoting their settlement and enhancing their value, the increased security to be afforded to the frontiers of the old States and to the interior of the newly acquired territories, in facilitating intercourse with the Indian tribes, in diminishing the expense and quickening the transit of national forces and munitions, thereby increasing the efficiency of governmental authority over a widely extended domain, the opening of a new and available channel to a valuable commerce long pent up and hitherto of difficult access, the development of the resources of a new country vastly fertile in mineral wealth, the discovery of new sources of commerce, and the opening of new fields of employment for great numbers of our people, the aid and encouragement to be afforded to the whole fabric of commerce to American harbors on the Pacific in immediate communication with those upon the Atlantic, the binding together the people of the Atlantic and of the Pacific, by adding to the ties of kindred those of common interests and sympathies, enabling us to say to the New Mexicans and Californians, 'we are one people,' and to the whole fabric of commerce to American harbors on the Pacific in immediate communication with those upon the Atlantic, the binding together the people of the Atlantic and of the Pacific, by adding to the ties of kindred those of common interests and sympathies, enabling us to say to the New Mexicans and Californians, 'we are one people,' and to the whole fabric of commerce to American harbors on the Pacific in immediate communication with those upon the Atlantic, the binding together the people of the Atlantic and of the Pacific, by adding to the ties of kindred those of common interests and sympathies, enabling us to say to the New Mexicans and Californians, 'we are one people,' and to the whole fabric of commerce to American harbors on the Pacific in immediate communication with those upon the Atlantic, the binding together the people of the Atlantic and of the Pacific, by adding to the ties of kindred those of common interests and sympathies, enabling us to say to the New Mexicans and Californians, 'we are one people,' and to the whole fabric of commerce to American harbors on the Pacific in immediate communication with those upon the Atlantic, the binding together the people of the Atlantic and of the Pacific, by adding to the ties of kindred those of common interests and sympathies, enabling us to say to the New Mexicans and Californians, 'we are one people,' and to the whole fabric of commerce to American harbors on the Pacific in immediate communication with those upon the Atlantic, the binding together the people of the Atlantic and of the Pacific, by adding to the ties of kindred those of common interests and sympathies, enabling us to say to the New Mexicans and Californians, 'we are one people,' and to the whole fabric of commerce to American harbors on the Pacific in immediate communication with those upon the Atlantic, the binding together the people of the Atlantic and of the Pacific, by adding to the ties of kindred those of common interests and sympathies,
